STAINLESS STEEL EUROBIN MACKIE BIN TUG

Authorised Partner

SITECRAFT

MATERIALS HANDLING EQUIPMENT

Euro Bins are widely used in food manufacturing, meat processing and other hygiene-critical applications.

The new Movexx Eurobin Tug is the ergonomic solution for the safe and efficient transport of these containers. The Eurobin Tug is easy to use, powerful and compact, allowing containers to be easily transported by a single operator, even in confined spaces. When using the Eurobin Tug, it's also possible to transport multiple bins, by coupling them as a train. The Eurobin Tug features an effective parking brake to hold the truck safely on slopes or on dock levellers.

Scan the QR code to watch the Eurobin tug video.
